VubaMac: Information Sheet

Vehicle Traffic

Product Overview

Our Vehicle Traffic build-up has been engineered to support the demands of medium-load environments such as residential driveways. The system is made up of a reinforced 30mm VubaMac base and mesh both above and below, the system delivers excellent load distribution and durability for regular vehicle use.

System Build-Up

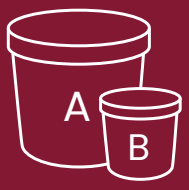

COVERAGE RATES	
Old Coverage	Vehicle Traffic 30mm - 2.3m²
New Coverage	Vehicle Traffic 30mm - 2.6m²

Kit Components:

2 Layers of 1mm Structural Reinforcement Mesh (SRM)

4.5kg VubaMac Resin

4x 25 kg Aggregate (6-10mm)

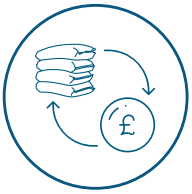

1 x 12.5kg MacMix 1-5mm

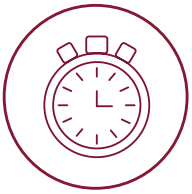

Alternatively, 1 x 12.5kg of 2-5 aggregate or a 50/50 blend of repurposed aggregate consisting of 2-5mm and 1-3mm size can be used to make up the 12.5kg.

See Base Build Up Sheet for more Information.

Benefits

Cost Saving: 14p/m² cheaper if using MacMix. 50p/m² cheaper if using own waste aggregate.

Efficient Method: Fewer mixes per job increases efficiency and saves time.

High Coverage: Over 10% more coverage per mix with the addition of MacMix.

Repurposed Aggregate: Allows you to reuse your waste aggregate.

Quick Application: Overlay possible on the same day.

Durable Surface: Stronger and longer lasting than Asphalt.
