VubaMac: Information Sheet

Patios & Paths

Product Overview

Our Patios & Paths build-up is tailored for low-load areas that may still have furniture on such as garden paths, patios, and pedestrian zones. The 15mm VubaMac base combined with a single layer of reinforcement mesh above ensures excellent stability, durability, and ease of installation.

System Build-Up

COVERAGE RATES	
Old Coverage	Patios & Paths 15mm - 4.5m²
New Coverage	Patios & Paths 15mm - 5m²

Kit Components:

Option 1: VubaMac MacMix standard

1 x 12.5kg MacMix 1-5mm | 4x 25 kg Aggregate (6-10mm) | 1 Layer of 1mm Structural Reinforcement Mesh (SRM) | 4.5kg VubaMac Resin

Alternatively, a 50/50 blend of recycled aggregate consisting of 2-5mm and 1-3mm size can be used to make up the 12.5kg.

Option 2: To repurpose your own waste aggregate

1 x 1/2 bag 1-3mm Aggregate (12.5kg) 2 x 25kg VubaMac Aggregate & 2 x 25kg 2-5mm Aggregate

OR

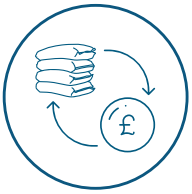

1 x 1/2 bag 1-3mm Aggregate (12.5kg) 2 x 25kg VubaMac Agg & 1 x 25kg 1-3mm Aggregate 1 x 25kg 2-5mm Aggregate

1 Layer of 1mm Structural Reinforcement Mesh (SRM) | 4.5kg VubaMac Resin

Note: Option 2 will result in a reduced coverage rate compared to using option 1 as this has reduced sized aggregate

See Base Build Up Sheet for more information.

Benefits

Cost Saving: 14p/m² cheaper if using MacMix. 50p/m² cheaper if using own waste aggregate.

Efficient Method: Fewer mixes per job increases efficiency and saves time.

High Coverage: Over 10% more coverage per mix with the addition of MacMix.

Repurposed Aggregate: Allows you to reuse your waste aggregate.

Quick Application: Overlay possible on the same day.

Durable Surface: Stronger and longer lasting than Asphalt.
